DETAILED ACTION

The Examiner acknowledges the applicant's submission of the amendment dated 2/1/2010.

The instant application having Application No. 10/570,290 has a total of 20 claims pending in the application, there are 2 independent claims and 18 dependent claims, all of which are ready for examination by the examiner.

ARGUMENTS CONCERNING PRIOR ART REJECTIONS

Rejections - USC 102/103

Applicant's amendment of claims 1 and 8 has been considered and has distinguished the applicant's invention from the prior art of record.

Thusly, the rejections of claims 1-20 have been withdrawn.

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Jeffrey T. Holman (Reg #51,812) on 5 May 2010.

The application has been amended as follows:

- Amend Claim 1 as follows:

- Replace Line 8 with –signal selection circuitry for identifying which memory modules have data cached in said cache memory--
- Replace Line 13 with –remapping means (RM, MapRAM) for performing a—
- Replace Line 14 with –remapping within said plurality of memory modules, wherein the—

- Amend Claim 8 as follows:
 - Replace Line 7 with –performing a remapping within said plurality of memory modules --
 - Replace Line 11 with –for at least two of the physical banks, wherein the remapping permits—
 - Replace Line 14 with –generating a hit' signal based on the hit signal, wherein the hit' signal is indicative of--

STATEMENTS OF REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

The primary reason for allowance of **Claim 1** rests in the combination with the inclusion of the following limitation of:

“wherein the remapping means is configured to generate a hit' signal based on the hit signal from the Tag RAM unit, wherein the hit' signal is indicative of a remapped

way for the data corresponding to the input address".

The examiner would like to note that the "(RM, MapRAM)" phrase of the claim has been construed by the examiner as having the meaning defined on page 7 of the submitted specification.

The primary reason for allowance of **Claim 8** rests in the combination with the inclusion of the following limitation of:

"generating a hit' signal based on the hit signal, wherein the hit' signal is indicative of a remapped way for the data corresponding to the input address".

These limitations above are taught by the specification at least on page 6, line 10, to page 7, line 24 of the submitted specification and Figure 3 of the submitted drawings. The subject matter recited in claims 1 and 8 are not taught or suggested by the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

CLOSING COMMENTS

Conclusion

STATUS OF CLAIMS IN THE APPLICATION

The following is a summary of the treatment and status of all claims in the application as recommended by **M.P.E.P. ' 707.07(i)**:

SUBJECT MATTER CONSIDERED ALLOWABLE

Claims 1-20 are considered patentably distinguishable over the prior art of record.
